**WE
THRIVE
IN OUR
ELEMENTS**

We're in our element when it comes to developing the perfect granule of nitrogen, phosphorus, sulphur and zinc – SOLISZ – to provide the best possible solution for your crops. And you're in your element when it comes to growing and producing them. **With SOLISZ, we all thrive in our elements.**

WENGFU AUSTRALIA

Working together

SOLISZ™ [N16 : P18 : S8 : Zn0.5%] is a unique and versatile compound fertiliser, suited to a wide range of cropping and pasture situations.

Promoting early plant vigor and development SOLISZ is the ideal starter solution when creating your fertiliser program.

- **containing all key elements in the one granule,** SOLISZ delivers high levels of Nitrogen, Phosphorus and Sulphur, as well as maintenance level of zinc.
- **manufactured using both elemental and sulphate sulphur,** SOLISZ ensures the needs of the crop are maintained throughout the growing season.
- **formulated with a fine micron Zinc Oxide,** SOLISZ will optimise zinc availability throughout the growing season.
- **developed for use in precision planting equipment,** the hard and even sized granules of SOLISZ provides excellent handling and storage characteristics.
